

True or false?

Water goes up the left of the stem to the left-hand side of the plant and the right of the stem to the right hand side of the plant.

Challenge 1:

Draw a diagram to show what you think will happen to the carnation and the celery. Label the diagram.

Challenge 2:

Make an annotated diagram, including a cross section of celery, to show what you think will happen to the carnation and the celery and to explain what this shows about the way water is transported in plants.

Challenge 3:

Make an annotated diagram, including a cross section, to show what you think will happen to the celery with and without leaves and to explain what this shows about the way water is transported in plants.
