

Exploring seed dispersal

**Think about the seeds you've seen in class
and watched on the video.**

Challenge 1:

- Draw a seed, similar to one you have seen, and describe to a partner how it is dispersed.
- Now make a model of your seed.

Challenge 2:

- Draw a seed, similar to one you have seen.
- Label the features which make it suited to how it is dispersed
- Now make a model of your seed.

Challenge 3:

- Imagine and then draw a seed using ideas from seeds you have seen.
- Label or annotate the features which make it suited to its method of dispersal.
- Now make a model of your seed.
